Prior experience in the insurance industry utilizing strong communication, collaboration, problem-solving, and analytical skills allow creation of the best site for any client, be in a personal one on one project or as part of a team. Possess the ability to design, build, and maintain websites from conception to production and beyond. Experience in the following areas: JavaScript, HTML5, CSS3, Node.js, jQuery, MySQL, MongoDB, Github, Bootstrap, AJAX, JSON, REST, React.js, APIs, Heroku, Firebase, ReactJS., Microsoft Suite, Git

## PROJECTS

Get Out! | [Get Out Repo](#) | [Get Out Site](#)

A one-page web app would allow the user to put in a set of dates, a city and an activity. The site would then connect to the OpenWeather and EventBrite API and return weather data and a list of activities in the chosen city based on the activity chosen. Contributed UI design, front end development and API requests. Technologies used were HTML, CSS, Materialize and Javascript.

Interested? | [Interested Repo](#)

Interested is a multiple page web app currently in development. Seeking to simplify dating apps to their core, Interested? asks only a few basic questions and allows the user to decide who is a great match by interaction, not a pre-programmed algorithm. Designed the UI and created custom React components for the site's navigation using Firebase for site authentication and MongoDB for database integration.
